Subject: Grade 4 HISTORY

Topic: Social Sciences (History): Exam Term 4

Total Marks: 88

-
1. TRUE 2
- Explanation:** Earphones had to be worn when listening to the first radios. Therefore, only one person could listen to the radio at a time.
-
2. TRUE 2
- Explanation:** Cattle, oxen and horses are bigger, stronger and faster than people.
-
3. FALSE 2
- Explanation:** Originated means "comes from originally". A junk was a ship built in China.
-
4. TRUE 2
- Explanation:** The San people ate non-venomous snakes. They also ate ones that were venomous! They knew how to prepare and cook their food extremely well so as not to be poisoned.
-
5. A 4
- Explanation:** Pigeons were trained to deliver mail. The message would be tied to the pigeon's foot.
-
6. B 4
- Explanation:** Whilst trying to improve the telegraph, Alexander Graham Bell invented the telephone.
-
7. D 4
- Explanation:** A cell phone cannot print, but it can send a document to a printer.
-
8. B 4
- Explanation:** Rock art can still be found across Southern Africa today. The San used rock art to express themselves and to depict scenes from their day-to-day lives.
-
9. C 4
- Explanation:** The Concorde became too expensive to make. There were also a few accidents involving the Concorde, which made them reconsider its use.
-
10. A 4
- Explanation:** Coal is used to heat water, the hot water then creates steam. The steam then makes the engine work. The smoke from a steam engine is blackish because of the coal.
-
11. C 4
- Explanation:** Bicycles may be used for pleasure and exercise today but this isn't the reason they were invented. Nor was the bicycle meant to carry more than one person. Prior to the invention of the bicycle, people already had a method of transport other than walking.
-
12. B 4
- Explanation:** Ocean liners are large ships that carry many passengers. There are many ocean liners on our seas today.
-
13. A 4
- Explanation:** The San most commonly made use of a bow and arrow when hunting. Arrows were tipped with a deadly poison which eventually caused death. For large animals, this could take as little as 7 hours - or as long as 3 days! The venom from beetles was often used to create this poison.

14. wire	3
Explanation: Signals, in the form of Morse code, would be sent along a wire. This method would send messages very quickly. This eventually led to the creation of the telephone. This has transformed into mobile telephones and all other kinds of mobile technology.	
15. Bill Gates	3
Explanation: Bill Gates and Paul Allen founded Microsoft on 4 April, 1975.	
16. space	3
Explanation: Space travel will soon become a reality. There are already space travel programs in development, for which some of the billionaires of the world have bought tickets. Richard Branson has a number of engineers working to make this possible.	
17. George Stephenson	3
Explanation: George Stephenson built the first steam locomotive. A steam locomotive is powered by coal. The steam locomotive was an exciting invention in the history of transportation.	
18. Durban	3
Explanation: Durban is South Africa's biggest container port. Durban is on the country's east coast. Pietermaritzburg is the capital of Kwa-Zulu Natal.	
19. eland	3
Explanation: The eland is their most spiritual animal.	
20. (1) Guglielmo Marconi	4 (2 per answer)
(2) radio	
Explanation: Marconi used radio waves to transmit Morse code. He was an Italian. Alexander Graham Bell invented the telephone.	
21. (1) feelings	4 (2 per answer)
(2) words	
Explanation: Dance is a form of communication. People dance when they want to express their feelings without using words.	
22. (1) oldest	4 (2 per answer)
(2) drawings	
Explanation: Art is the oldest form of communication. People use drawings as a form of communication. Signals would not apply as signals are not a form of art.	
23. (1) farthing	6 (2 per answer)
(2) high-wheel	
(3) sizes	
Explanation: The penny and the farthing coins. One is big and the other is small. The Penny-Farthing bicycle has two wheels - one large and the other small.	
24. (1) a group of	4 (2 per answer)
(2) clicks	
Explanation: The San spoke a group of languages, easily identifiable by the clicks commonly heard when they spoke. These clicks are shown in writing by ! or / signs.	

25. (1) blue

4 (2 per answer)

(2) green

Explanation: The San did not use the colours blue or green in their rock paintings. They mainly used red and other colours ranging from orange to brown, white, black and yellow.
